

**YVCOG MTP/RTP Update**  
**Summary of November 16 MPO/RTPO TAC Meeting**

The Transpo Group presented summaries of the transportation system data that was provided by YVCOG and member agencies, and preliminary findings. Additional transportation data needs were discussed. Transpo also reported on the status of the update of the travel forecasting model. AHBL presented existing and forecast land use data that will be used in the travel forecasting model update, and identified questions that need to be addressed. It was decided that members of the TAC would hold individual meetings with the consultant team on November 29 to transfer and discuss transportation system data and address land use data questions. The program for the upcoming public workshops to be held on December 12 and 13 was also discussed. The consultant team will summarize the public workshops at the December 14 TAC meeting.
