Name:

Transportation Planner Pre-interview Questionnaire:

1. What would you bring to the team if offered the Transportation Planner position?

2. What job skills do you feel you could use training on? Why?

3. The Transportation Planner will work with 14 member jurisdictions, multiple levels of government, and transportation agencies and stakeholders. How would you anticipate serving all 14 YVCOG member jurisdictions with competing priorities? How do you react when a project that you have spent time on is not well received or is rejected?

4. Describe your experience working with GIS, transportation meta-data, or governmental dashboard systems. What methods have you found effective in utilizing those systems?

5. What planning experience do you have in specific transportation areas (roads, aviation, rail, trails, human powered devices, etc.) or publicly/privately participated in a comprehensive transportation stakeholder engagement process?

6. Tell us about your experience and role developing analysis in an effective format for land use, transportation planning, or traffic modeling.

7. You may be required to attend occasional <u>night</u> meetings, travel to/from communities around the region and attend meetings or conferences out of the area that require overnight stays. Do any of these conditions present any problems for you?

8. This is an onsite position. Are you willing to relocate to the area if offered the position?

9. If offered this position, when could you start?
